Steps

Berries Confit

1. We need to start with the Berries Confit (Jam) (1 Cup or 300 g), you will need more or less 1 Cup or 300 g
2. The recipe is [HERE](#)
3. Of course you can use purchased jam, but make sure it's not too "runny"
4. After making the confit (jam), store in the fridge

The Pavlova Meringue

5. The Pavlova Meringue is a French Meringue to which we add Lemon and Cornstarch : this helps to dry out the meringue
6. Pour the Egg Whites (4 Tablespoons or 60 g) into a mixing bowl and wait 30 minutes (they will whip much better if they are at room temperature)
7. Start whipping: You may use either a stand mixer (like a Kitchen Aid appliance) or an electric beater
8. Start on moderate speed (egg whites will hold better): With the stand mixer, I use the Speed #4 (1-10)
9. After 4 minutes, pour the first Sugar (1 Tablespoon or 20 g)
10. Increase the speed: With the stand mixer, I use the Speed #6 (1-10)
11. After 3 minutes, pour the 2nd Sugar (1 Tablespoon or 20 g)
12. Increase the speed: With the stand mixer, I use the Speed #8 (1-10)
13. After 2 minutes, add in the Lemon Juice (1 teaspoon or 4 g)
14. Over the bowl, sift the Corn Starch (2 teaspoons or 7 g)

15. Increase the speed and keep whipping for 1 minute. With the stand mixer, I use the Maximum Speed #10 (1-10)

16. Over the bowl, sift the Icing Sugar (1/4 Cup or 50 g)

17. Manually fold, with a rubber spatula

18. Transfer to a Pastry Bag with a Plain Pastry Tip, 0.78" (or 25/32" or 2 cm) in diameter

Baking

19. You may shape the meringue the way you want. I am going to shape my meringue in a circular shape, with "little balls"

20. One trick to make a nice regular shape is to "dip" a pastry ring into icing sugar and transfer onto the silicone mat or the parchment paper

21. That way, you have a pattern that will help you pipe a perfect shape

22. Pipe the pavlova meringue

23. Bake in preheated oven at 220 F / 100 C for 3 hours or more

24. Then turn off the oven and let the meringue dry out a few hours

25. The meringue must be completely dried and at room temperature

Chocolate Coating

26. Additionally, I recommend to melt white chocolate and coat the meringue : the fat from the chocolate will prevent the meringue to turn soggy when we add the jam confit and the cream

The Lime Cream

27. In a clean mixing bowl, add in: the Mascarpone Cheese (1 Cup or 220 g), the Cream (1 Cup or 220 g), the Icing Sugar (1/3 Cup or 66 g). Split and grate the seeds of the Vanilla Bean (1), then add in the seeds. As an alternative, you may use Vanilla Paste, but avoid vanilla extract if you can

28. Over the bowl, scrape the Lime Zests (1/2 teaspoon or 1/2 g). I like to use a microplane for this

29. Place the bowl in the fridge for at least 30 minutes : once cold, the cream and ingredients will whip much better !

30. Then, whip the lime cream: You may use either a stand mixer (like a Kitchen Aid appliance) or an electric beater

31. Transfer the whipped cream in a Pastry Bag with the same Piping Tip (so to obtain same size balls as the meringue)

32. Pipe a first "ring" of small balls over the meringue

33. Pour the Berries Confit (Jam) (1 Cup or 300 g), then spread using an offset Icing Spatula

34. Make sure the Berries Confit (Jam) is cold (if too hot, it would melt the cream)

35. Pipe a second layer of whipped cream

36. Pour a second layer of confit/jam

37. Make sure the pavlova is shaped into a "dome". Do avoid a "pyramidal shape" which is not as good looking

38. Sprinkle Snow Sugar (The recipe is [HERE](#))

39. Then top the pavlova with berries : Strawberries, Raspberries, Blackberries, etc... Any seasonal berries you like !
